

Technical Workshop 2017

About

The PMSE-xG Project is a research project co-funded by the German Ministry of Transportation and Digital Infrastructure (BMVI).

Programme Making and Special Events (PMSE) covers technologies for production, event, and conferencing deployed mainly by creative and cultural industries. PMSE-xG focusses on technological and economic feasibility of PMSE in 4G+/5G. It tries to anchor PMSE applications in the standardization of mobile broadband radio. This opens new chances and opportunities in the field of innovative business segments, new products, new services and applications.

We invite you to discuss uses case, business roles, requirements, technical limitations, and the potentials of a future deployment of 5G-based technology by professional user industries (verticals), including (but not limited to) PMSE, Industry 4.0, Agriculture, Public Safety and Automotive.

Register now via <http://www.pmse-xg.de>

Date and Time

Fri 1 December 2017
11:00 – 16:00 CET

Location

Nokia Networks,
Werinherstraße 91, Entrance: Gebäude 41, 81541 Munich

Agenda

10:30 - 11:00	Registration	
11:00 - 11:10	Welcome and Agenda	
11:10 - 11:30	Introducing the PMSE-xG Project	Dr. A. Wilzeck, Project Office
11:30 - 11:50	PMSE-xG: Use Cases and Requirements	Dr. A. Schmidt, Sennheiser
11:50 - 12:10	Industry 4.0: Use Cases and Requirements	Dr. A. Müller, Bosch
12:10 - 12:30	Network Slicing: Concepts and Solutions	Dr. D. Soldani, Nokia
12:30 - 12:50	Multi-Access Edge Computing	Dr. V. Frascolla, Intel
12:50 - 13:45	Lunch Break with Demonstrations	
13:45 - 14:00	PMSE-xG: Basic Stakeholder Analysis	Dr. Pérez-Guirao, Project Office
14.00 - 15:45	World Café	
	- How to get verticals involved in 5G?	
	- Own local 5G network deployment and operation vs. network slicing	
	- Time sensitive networking in 5G	
	- Status and required standardization and regulation activities and more ...	
15:45 - 16:00	Wrap-up and Closing	

Organized by PMSE-xG Project Office
wiseSense GmbH - Lange Laube 18 - 30159 Hannover
